1. Claims 1-39 are presented for examination. However, restriction to one of the following inventions is required under 35 U.S.C. § 121:

I. Claims 1-33 and 37-39, drawn to "a system and method of hot swapping modules including a power module in a computer network appliance ", classified in Class 710, subclass 302.

II. Claims 34-36, drawn to "a method of remotely booting a CPU module in a computer network appliance", classified in Class 709, subclass 219.

Inventions I and II are related as combination and subcombination.

Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed in claims 1-33 and 37-39 does not require the "method of remotely booting a CPU module in a computer network appliance" claimed in claims 34-36. Furthermore, the subcombination as claimed in claims 34-36 has separate utility such as the subcombination can be used in software upgrading by downloading new software or boot versions from a remote source. See MPEP § 806.05(c).

2. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction of claims (1-33 and 37-39) and 34-36 for examination purposes is proper.

3. Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed.

4. Applicant should cancel the non-elected claims. However applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be

amended in compliance with 37 C.F.R. § 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 C.F.R. § 1.48(b) and by the fee required under 37 C.F.R. § 1.17(h).

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Gopal C. Ray whose telephone number is (703) 305-9647. The examiner can normally be reached on Monday - Friday from 8:00 AM - 4:30 PM.

All Internet e-mail communications will be made of record in the application file. PTO employees do not engage in Internet communications where there exists a possibility that sensitive information could be identified or exchanged unless the record includes a properly signed express waiver of the confidentiality requirements of 35 U.S.C. 122. This is more clearly set forth in the Interim Internet Usage Policy published in the Official Gazette of the Patent and Trademark on February 25, 1997 at 1195 OG 89.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to TC2100 receptionist whose telephone number is (703) 305-3900.
